

NEW COLLECTION SPRING/SUMMER 2027

WEARABLE ART

# LIQUID LIGHTS

**Wearable Art** is an independent artisan brand created by an artist couple, bringing together hand-dyed silk textiles and handcrafted silver jewelry in contemporary wearable art.

**Each silk scarf** is individually hand-dyed using traditional batik and shibori techniques on carefully selected 100% silk fabrics, including Twill, Crepe de Chine and Chiffon.

Every piece is hand-finished with rolled edges, embracing the natural variations that make each creation truly one of a kind.

The **silver jewelry** is handcrafted in small batches or as unique pieces, from the original design to the final finishing. Created in sterling silver, each design reflects the same commitment to craftsmanship, timeless aesthetics and artistic expression.

Guided by the principles of slow craftsmanship, Wearable Art celebrates authenticity, individuality and enduring quality. Every collection is designed and handcrafted in Romania, where traditional techniques meet a contemporary artistic vision.

# The LIQUID LIGHTS COLLECTION

celebrates the freedom of summer: water as life-giving force and a language of communication, expressed through movement, light, and color in an elegant dialogue.

Hand-painted silk scarves and shawls, crafted with batik and shibori techniques, are complemented by handmade silver jewelry.

Each piece reflects water's many facets: the reflection of tranquility, the energy of waves, the quiet depths, and the play of light on the surface.

The collection presents the theme in two adjacent yet contrasting leitmotifs: the abstract elegance of water and its painterly, storytelling manifestations.
